Corina Saebels

Alien Abduction and Personal Family Experiences

Saturday, June 7, 2008

"I am an independent UFO/Abduction researcher. Having had experiences since childhood, I truly understand the need for connecting with others who may have had similar things happen to them."

Vancouver Public Library
350 West Georgia Street

Tickets \$18 at the door
e-mail: contactus@ufobc.ca to reserve tickets

Doors at 6:30 pm
Lecture 7:00 to 9:00 pm

Corina Saebels has had a lifetime of experiences right here in British Columbia. She has recently written a book and has started lecturing about the strange events that have occurred to her and her family. Please join us in what is sure to be a riveting evening. ... and bring a friend.

Corina resides in Kelowna, B.C. Canada. She has lectured, both in Canada and the United States and has also been a guest speaker on several radio programs, such as the Vike Report "Innerstreams Radio Network", the "Jeff Rense Radio Show", and "Whitley Strieber's " Unknown Country". She has appeared on the "Montel Williams Show", as well as two T.V. Documentaries, "Creepy Canada" and "Intruders". She currently runs a Paranormal Support Group for those wishing to discuss their unusual experiences.

<p>"The Collectors"</p> 	<p>About the Book</p> <p>"The Collectors is a riveting story of one woman's struggle to bring forward her personal experiences which are deeply moving and sobering. The Collectors is an in-depth look into one's personal life and continuing visitations. It covers eyewitness reports as well as photos of physical evidence. This book will change the way you think about the UFO phenomenon forever."</p> <p>- Brian Vike Director of HBCC UFO Research.</p> <p>Reviews</p> <p>Corina Saebels had an authentic close encounter experience, documented by the presence of another witness and medical observation of the after effects. This is one of the most credible and detailed stories of alien abduction ever told, and a must read for anybody who cares about this strange and powerful human experience."</p> <p>Whitley Strieber</p>

RECENT SIGHTINGS

02-April-2008 Chilliwack, BC

At first I thought it was a star, a really bright star, (I even made a little wish on it) Then it looked like it was moving a little, but not enough to be a satellite or an airplane. then I noticed flickering red, blue and white lights. It appeared to be hovering but as i say at a great enough distance to be thought of as a star or a satellite, or a far off plane. I woke my husband up and made him have a look and to be sure that my eyes weren't tricking me and he made the same observations that I did. I never stayed up long enough to watch it to see if it went away.

04-April-2008 Witnessed: August 14, 2007, Squamish, BC Canada

I have a interesting and very convincing UFO photo that I think your organization would like to have a look at.

I took the photo while I was up on Brohm's Ridge above Squamish while conducting an Environmental Assessment (EA) for a proposed project.

I never new it was there until recently when I was re-examining my photos over this last weekend. The Object is definitely saucer shape and it appears over Squamish - Howe Sound. The time of day was around 2:30 PM. The Object is greyish with no lights visible.

This is the original photo I took while up on Brohm's Ridge above Cat Lake Squamish BC Canada. This photo was taken with a Cannon digital camera on August 14, 2007 at approx. 2:PM, the day was a partly cloudy and warm. I was facing SW looking out towards the Howe Sound, below is District of Squamish. I used my photo software to zoom in on it and it definitely is a classic saucer shape. I also used my colour curve adjustments to do some filter adjustments and they all show the same saucer shape.

I showed a couple of my colleges at work and they are all convinced that this is a UFO and suggested I report it.

I live and work in the North Vancouver area.

UFOBC Replies:

Yes, we would very much like to take a look at the photo - would you mind emailing us a copy? Or if you like, send it to our postal address.

Could you also provide a few more details about the sighting? Time, direction of travel, weather conditions, distance/altitude etc?

Thank-you, all the best,

Richard

UFOBC.

Note: The witness included the above information and the sighting has been updated.

12-04-08, Abbotsford, BC 9:45pm

My boyfriend and I were heading east bound back home to Chilliwack, when we spotted a bright light in the sky by the mountain. We thought it was strange because the object appeared to be hovering or going rather slowly. The light projection was quite bright as well. As we got closer we noticed it didn't seem to be moving at all and staying in one spot. Also, it was a circular air craft that we had not seen before. At first we thought a helicopter, then realized it couldn't be because of the shape and there were lights all around the object in a circular pattern. If any one else seen it the would be nice to get feedback to clarify what we saw.

16-04-08, Witnessed: Various dates, 2007 to present, New Westminster BC

A few times now, usually between 10 pm and 2am, I've seen small, slow moving red/orange lights near the Alex Fraser bridge or possibly Annacis Island. I can see them from our bedroom window. To me, they look like flares from a flare gun.. but why is someone shooting flares around there? One light will appear near the horizon, drift very slowly upwards then hang in the air for quite a while. Often another will appear maybe a half mile away, float up, hang there, and sometimes a 3rd. I usually fall back asleep before I see them disappear. I see a lot of lights around there at night, but most of it I figure is from the docks or industrial zones in that area (eg. the VERY BRIGHT light that woke me up at 3am this morning, April 16th... looked like a soccer field light pointed right in our window..5 or 6 squareish BRIGHT lights clustered together. Haven't seen that before!)

16-04-08, Witnessed April 12 2008, mid evening, Chilliwack BC

I'm not sure of the exact time, but I was at home with my 4 children aged 16 through to 6. It was mid evening, so roughly 8pm give or take. Something struck me as unusual. I smoke outside the back door and noticed what looked like a small plane, maybe, relatively high in the sky, but the thing that struck me as unusual was that it was pulsing a red light that covered the shape of the craft, so at that height it was impossible to make out the shape of the craft, but that it came in a straight line to between the tops of two trees the are angled to each other on the back of the property, and then hovered for over 3 minutes, sort of blinking back on forth from one spot to the next, all the while pulsing a red light. It occurred me that planes don't do this. I called my children over, and all of them saw it. My 8 year old started waving at it and saying "We come in peace" and my 12 year old climbed on top of our shed. I wanted them in the house immediately as I had never seen a small airplane behave in this manner, though it had a faint sound that seemed like an airplane, but not like a helicopter. Just in case, I wanted them in the house. Then, the craft flew towards and beyond town. I went out our front door, and the speed and distance covered seemed to match a small airplane, and the faint sound. I still could not make out its shape, only the pulsing red light.

22-04-08, Witnessed April 5th 2008, Victoria, BC

I had just left a friend's house when I noticed a very bright light off to the west. It was as bright as any landing light I had ever seen. I called to my friend and he joined me outside. The light traveled west to east at a very slow rate. Thinking it was a helicopter I listened very carefully. There was no sound. There were no navigation lights. There was no flashing white light. The light did not get duller as it moved to the east. A regular landing light has a very distinct pattern and this was not reducing in luminosity at all. I searched for an answer and did not get one. I saw it pass behind a cloud and lost sight of it. I estimate the altitude at 1000 to 2000 meters. I told my friend that it was probably a helicopter but for now it was a UFO. Suddenly there was something else that happened. At a very much higher altitude there appeared another light much like a satellite. It was brighter than any I have ever seen and followed the exact path as

the first one and at the same speed. I am convinced that the first one was not a known aircraft and the second one was not a satellite.

My background consists of 33 years of flying and a lifetime of interest in the UFO phenomenon.

I am also an amateur astronomer.

22-04-08, Witnessed April 15th 2008, UBC, BC

UFOBC had 2 separate calls of groups of people seeing a long green light beam coming from the sky down to UBC at around 2130hrs on the night of the 15th.

Not to worry, thanks to some snooping by UFOBC and one of our witnesses, it was quickly uncovered that UBC's Centre for Atmospheric Research were doing some laser testing with a high intensity green laser at around 532 nm wavelength.

2-05-08 Witnessed April 30th 2008, UBC, BC

Six plus people witnessed a green wavy light high up in the south west sky over UBC. April 30 2008 approximately 10pm. Light stayed high in the sky, and seemed to flicker, and shimmer. Looked about the size of a dime from the distance.

Thought it could be the moon behind clouds?

UFOBC Replies:

This is another sighting of UBC's green laser being used for atmospheric research.

Thank-you,

Richard UFOBC

13-05-08 Witnessed May 5th 2008, Williams Lake, BC 4:30am

I was driving back from Langley on my way back to Quesnel when on Monday may 5th 2008 at approx 430am I spotted a large circular object just above the trees the object had lights all around the outside of it almost like them clear Christmas lights I then glanced at the highway in front of me and by the time I looked back to the treetops the object disappeared. this is a true story that I am telling you and I swear by it.
